Foreword xv

Preface xvii

Acknowledgements xx

Introduction 1

Alison Hopkins and Joseph Montgomery

The Wound Care Burden 1

The Cost of Sub-Optimal Wound Care 3

Classification of Dressing Products 4

Dressing Product Analysis 6

Online Non Prescription Services 7

Conclusion 9

References 9

Chapter 1 Aetiology 11

Aby Mitchell

Normal Venous Function 11

Veins in Action 16

Blood Pressure in Veins and Capillaries 17

Venous Disease 18

Pathophysiology of Chronic Venous Disease 19

Theories of Tissue Damage 21

Chronic Venous Insufficiency 23

Risk Factors for Venous Insufficiency 24

Arterial Disease 24

The Skin 33

Wound Healing 35

Phases of Wound Healing 36

Conclusion 39

References 39

Chapter 2 Lymphoedema and Chronic Swelling 43

Caitriona O'Neill and Rhodri Harris

Function of the Lymphatic System 43

Prevalence and Key Facts 48

Causes of and Risk Factors 52

Assessment, Diagnosis and Staging 55

Management Challenges 66

Lymphovenous Disease 68

Treatment 74

Compression Therapy and Assessment Considerations 76

Adjunct Treatment Modalities 79

Surgery 82

Palliative Care 83

Lipoedema 87

Summary 97

References 97

Chapter 3 Atypical Causes of Leg Ulceration 106

Sarah Bradbury and Kirsten Mahoney

Inflammatory/Autoimmune Disorders 107

Metabolic Disorders 134

Malignant/Neoplastic Wounds 145

Drug- Induced Leg Ulcers 155

Erosive Pustular Dermatitis 161

Infective Conditions 172

Conclusion 176

References 177

Chapter 4 Musculoskeletal Factors in Leg Ulcers: Assessment and Management 188

Rona Frances Campbell

Risk Factors 190

Lower Limb Venous-Muscular Pumps 192

Ankle Joint Assessment 196

Holistic History Taking Relating to Factors that Influence Biomechanical Lower Limb Function
198

Management 205

Reducing Falls Risk 216

Allied Health Professionals as Part of the Multidisciplinary Team 218

Conclusion 218

References 219

Chapter 5 Assessment of Leg Ulceration 226

Karen Staines and Aby Mitchell

Assessment 227

History Taking 227

Examination 238

Arterial Disease 248

Wound Assessment 252

Skin Assessment 263

Diagnostic Assessment 265

How to Perform a Handheld Doppler 268

Red Flags for the Urgent Treatment of Patients with Venous Leg Ulcers 276

Reassessment and Recurrence 276

Conclusion 276

References 277

Chapter 6 Holistic Management of Pain 285

Fran Worboys and Alison Hopkins

The Pain Experience 285

Theories of Pain 287

Causes of Pain 292

Types of Pain 293

Pain Cycles: Never- Ending Pain 295

Impact of Pain on People's Lives 296

Causes of Pain 296

Pain Management Solutions: Assessment 298

Managing Pain 303

Conclusion 312

References 312

Chapter 7 Personalised Care in Leg Ulceration 318

Alison Hopkins and Charlotte Smith

The Wider or Social Determinants of Health 319

Wider Determinants of Engagement with Treatment 324

Making Effective Change 326

What Influences Practitioners' Decision-Making in Leg Ulcer Management? 329

The influence of Confidence, Courage and Competence 330

A Problematic Culture Within Leg Ulcer Management	332
Challenging Non- compliance	335
Understanding the Lived Experience	338
Support Personal Health Management Through Patient Activation	339
Patient Activation Measure	340
Shared Decision- Making	340
Social Prescribing	342
Motivational Interviewing	342
Supporting Self- Management	343
Legs Matter Coalition: Raising Awareness of Lower Limb Conditions	345
Peer Support Groups	345
Using Positive Language to Promote a Positive Culture	346
Conclusion	347
References	348
Chapter 8 Clinical Management of the Lower Limb	353
<i>Georgina Ritchie</i>	
The Case for Early Intervention	360
Clinical Management	360
What Is Compression Therapy and How Does it Work?	372
Anti- inflammatory Action of Compression Therapy	381
Cautions and Contraindications	384
Considering and Commencing Treatment	386
Location of the Ulceration	396
Compression of the Foot	396
Intermittent Pneumatic Compression	397

Wound Bed Preparation and Clinical Management 398

Conclusion 400

References 400

Chapter 9 Lifelong Management 405

Jane Harry

Factors Influencing Venous Ulcer Recurrence 407

Holistic Reassessment Including Ankle Brachial Pressure Index 409

Endovenous Ablation 411

Compression Therapy Systems 411

Assessing for Compression Hosiery 413

Choosing and Prescribing Hosiery 415

Other Considerations when Choosing a Compression Therapy System 423

Empowering Patients' Self- Management for Leg Ulcer Prevention 434

Knowledge, Staff and Training 439

Public Health 441

Patient Satisfaction and Quality of Life 450

Leg Ulcer Pathways 450

Conclusion 451

References 452

Index 457
