

Status of Biopesticides and Biocontrol Agents in Agriculture: An Overview

*Trichoderma*: An Impeccable Plant Health Booster

*Aspergillus Niger*: A Phosphate Solubilizing Fungus as Biocontrol Agent

Fluorescent Pseudomonads: A Potential Bio-Control Agent Against Plant Diseases

Entomopathogenic Fungi: Introduction, History, Classification, Infection Mechanism, Enzymes and Toxins

Entomopathogens and Their Mass Production and Application

Entomopathogenic Nematodes: An Emerging Biocontrol Agent for Insect Pests Management

Role of Insect Viruses in the Management of Insect Pests

*Trichogramma*: An Egg Parasitoid in Insect-Pest Management

Coccinellids in Insect Pest Management: Problems and Prospects

Chrysopid: A Potential Bio-Control Agent

Genetically Modified Crops for Insect Pests and Disease Resistance

*Bacillus Thuringiensis* and Insect-Pests' Management

Role of Phytochemicals in Insect Pests' Management
