

1 Production and Utilization of Milk	1
1.1 Introduction	1
1.2 Composition and Variability of Milk	1
1.3 Classification of Mammals	3
1.4 Structure and Development of Mammary Tissue	4
1.5 Ultrastructure of the Secretory Cell	7
1.6 Techniques Used to Study Milk Synthesis	8
1.6.1 Arterio-Venous Concentration Differences	8
1.6.2 Isotope Studies	9
1.6.3 Perfusion of Isolated Gland	9
1.6.4 Tissue Slices	9
1.6.5 Cell Homogenates	9
1.6.6 Tissue Culture	10
1.7 Biosynthesis of Milk Constituents	11
1.8 Production and Utilization of Milk	11
1.9 Trade in Milk Products	15
References	18
Suggested Reading	19
2 Lactose	21
2.1 Introduction	21
2.2 Chemical and Physical Properties of Lactose	24
2.2.1 Structure of Lactose	24
2.2.2 Biosynthesis of Lactose.....	26
2.2.3 Lactose Equilibrium in Solution	27
2.2.4 Significance of Mutarotation	28
2.2.5 Solubility of Lactose	28
2.2.6 Crystallization of Lactose	29
2.2.7 Problems related to Lactose Crystallization	32

Contents

2.3 Production of Lactose	40
2.4 Derivatives of Lactose	43
2.4.1 Enzymatic Modification of Lactose	43
2.4.2 Chemical Modifications	44
2.4.3 Fermentation Products	48
2.5 Lactose and the Maillard Reaction	53
2.6 Nutritional Aspects of Lactose	56
2.6.1 Lactose Intolerance	56
2.6.2 Galactosemia	59
2.7 Determination of Lactose Concentration	60
2.7.1 Polarimetry	61
2.7.2 Oxidation and Reduction Titration	61
2.7.3 Infrared (IR) Spectroscopy	63
2.7.4 Colorimetric Methods	63
2.7.5 Chromatographic Methods	63
2.7.6 Enzymatic Methods	63
2.8 Oligosaccharides	64
References	66
Suggested Reading	68
3 Milk Lipids	69
3.1 Introduction	69
3.2 Factors that Affect the Fat Content of Bovine Milk	70
3.3 Classes of Lipids in Milk	72
3.4 Fatty Acid Profile of Milk Lipids	76
3.5 Synthesis of Fatty Acids in Milk Fat	82
3.6 Structure of Milk Lipids	86
3.7 Milk Fat as an Emulsion	90
3.8 Milk Fat Globule Membrane	91
3.8.1 Isolation of the Fat Globule Membrane	92
3.8.2 Gross Chemical Composition of FGM	93
3.8.3 The Protein Fraction	93
3.8.4 The Lipid Fraction	95

3.8.5 Other Membrane Components	96
3.8.6 Membrane Structure	97
3.8.7 Secretion of Milk Lipid Globules	99
3.9 Stability of the Milk Fat Emulsion	102
3.9.1 Emulsion Stability in General	102
3.9.2 The Creaming Process in Milk	104
3.10 Influence of Processing Operations on the Fat Globule Membrane	107
3.10.1 Milk Supply: Hydrolytic Rancidity	107
3.10.2 Mechanical Separation of Milk	109
3.10.3 Homogenization	112
3.10.4 Heating	115
Contents	
xiii	
3.11 Physical Defects in Milk and Cream	115
3.11.1 Free Fat	116
3.12 Churning	117
3.12.1 Buttermilk	121
3.13 Freezing	122
3.14 Dehydration	122
3.15 Lipid Oxidation	123
3.15.1 Autocatalytic Mechanism	123
3.15.2 Pro-oxidants in Milk and Milk Products	126
3.15.3 Antioxidants in Milk	128
3.15.4 Spontaneous Oxidation	128
3.15.5 Other Factors that Affect Lipid Oxidation in Milk and Dairy Products	129
3.15.6 Measurement of Lipid Oxidation	130
3.16 Rheology of Milk Fat	130
3.16.1 Fatty Acid Profile and Distribution	130
3.16.2 Process Parameters	132
3.17 Analytical Methods for the Quantitative Determination	

of Milk Fat	135
3.18 Appendix A: Principal Fatty Acids in Milk Fat	138
3.19 Appendix B	139
3.20 Appendix C	141

4 Milk Proteins	145
4.1 Introduction	145
4.2 Heterogeneity of Milk Proteins	148
4.2.1 Other Protein Fractions	149
4.3 Preparation of Casein and Whey Proteins	150
4.3.1 Acid (Isoelectric) Precipitation	150
4.3.2 Centrifugation	151
4.3.3 Centrifugation of Calcium-Supplemented Milk	151
4.3.4 Salting-Out Methods	151
4.3.5 Ultrafiltration	152
4.3.6 Microfiltration	152
4.3.7 Gel Filtration (Gel Permeation Chromatography)	153
4.3.8 Precipitation with Ethanol	153
4.3.9 Cryoprecipitation	153
4.3.10 Rennet Coagulation	154
4.3.11 Other Methods for the Preparation of Whey Proteins	154
4.4 Heterogeneity and Fractionation of Casein	154
4.4.1 Resolution of Caseins by Electrophoresis	155
4.4.2 Microheterogeneity of the Caseins	160
4.4.3 Nomenclature of the Caseins	162
Contents	
xiv	
4.5 Some Important Properties of the Caseins	163
4.5.1 Chemical Composition	163
4.5.2 Secondary and Tertiary Structures	173
4.5.3 Molecular Size	176

4.5.4 Hydrophobicity	177
4.5.5 Influence of Ca ²⁺ on Caseins	177
4.5.6 Action of Rennets on Casein	178
4.5.7 Casein Association	178
4.6 Casein Micelles	178
4.6.1 Composition and General Features	178
4.6.2 Stability	179
4.6.3 Principal Micelle Characteristics	181
4.6.4 Micelle Structure	183
4.7 Whey Proteins.....	187
4.7.1 Preparation	187
4.7.2 Heterogeneity of Whey Proteins	188
4.8 β -Lactoglobulin	189
4.8.1 Occurrence and Microheterogeneity	189
4.8.2 Amino Acid Composition	189
4.8.3 Primary Structure	190
4.8.4 Secondary Structure	190
4.8.5 Tertiary Structure	190
4.8.6 Quaternary Structure	192
4.8.7 Physiological Function	193
4.8.8 Denaturation	193
4.9 Whey Acidic Protein	193
4.10 α -Lactalbumin	194
4.10.1 Amino Acid Composition	194
4.10.2 Genetic Variants	194
4.10.3 Primary Structure	194
4.10.4 Secondary and Tertiary Structure	194
4.10.5 Quaternary Structure	196
4.10.6 Other Species	196
4.10.7 Biological Function	196
4.10.8 Metal Binding and Heat Stability	196
4.10.9 Apoptosis Effect on Tumour Cells	196

4.11 Blood Serum Albumin	197
4.12 Immunoglobulins (Ig)	198
4.13 Proteose Peptone 3	202
4.14 Minor Milk Proteins	202
4.15 Non-protein Nitrogen	202
4.16 Interspecies Comparison of Milk Proteins	203
4.17 Synthesis and Secretion of Milk Proteins	205
4.17.1 Sources of Amino Acids	206
4.17.2 Amino Acid Transport into the Mammary Cell	206

Contents

xv

4.17.3 Synthesis of Milk Proteins	206
4.17.4 Modifications of the Polypeptide Chain	209
4.17.5 Structure and Expression of Milk Protein Genes	210
4.17.6 Secretion of Milk-Specific Proteins	210
4.17.7 Secretion of Immunoglobulins.....	212
4.18 Functional Milk Protein Products	213
4.18.1 Industrial Production of Caseins	215
4.18.2 Novel Methods for Casein Production	219
4.18.3 Fractionation of Casein	220
4.18.4 Functional (Physicochemical) Properties of Caseins	221
4.18.5 Applications of Caseins and Whey Proteins	223
4.18.6 Casein-Whey Protein Co-precipitates	223
4.19 Methods for Quantitation of Proteins in Foods	226
4.19.1 Kjeldahl Method	226
4.19.2 The Formol Titration	229
4.19.3 Absorbance of UV Light	229
4.19.4 Biuret Method	230
4.19.5 Folin-Ciocalteu (F-C) Method	230
4.19.6 Dye-Binding Methods	230
4.19.7 Bradford Method	231
4.19.8 Infra-Red Spectroscopy	231

4.19.9 Dumas Method	231
