

Introduction

R.C.Richard Davison and Paul M. Smith

Part 1

1.1 Professional Competency and Working with Others

Michael J. Price, Andrew M. Miles, Paul M. Smith

1.2: Physiological Exercise Testing: Ethical Considerations

Steve R. Bird and Andrew Smith

1.3: Health and Safety in Duty of Care: Evaluating and Stratifying Risk

S. Andy Sparks, Kelly Marrin, and Craig A. Bridge

1.4: Safeguarding in Physiological Testing

Emma Kavanagh and Daniel Rhind

1.5: Influence of Medication on Typical Exercise Response

Thom Phillips and Patrick Orme

Part 2

2.1: Data Intelligence and Feedback in a Clinical Context

Sarah Gilchrist and Mark Holmer

2.2: Reliability and Measurement Error

Shaun J. McLaren

2.3 Scaling: Adjusting Physiological and Performance Measures to Body Size

Edward Winter and Simon Jobson

Part 3

3.1: Participant Pre-test Preparation and Evaluation

Rachel Lord and Brian Begg

3.2: Maintenance and Calibration Standards: A Cornerstone of Laboratory Quality Assurance

David Green and Glyn Howatson

3.3: Lung and Respiratory Muscle Function

John Dickinson and Karl Sylvester

3.4: Surface Anthropometry

Susan C. Lennie

3.5: Functional Screening

Mike Duncan, Stuart Elwell, and Mark Lyons

3.6: Assessment of Free-living Energy Expenditure

Enhad A. Chowdhury, Oliver J. Peacock, and Dylan Thompson

3.7: Respiratory Gas Analysis

Simon Marwood and Richie P. Goulding

3.8: Metabolic Threshold Testing: Interpretation and Prognostic Prescriptive Value

Mark Burnley and Matthew I. Black

3.9: Ratings of Perceived Exertion

John Buckley and Roger Eston

3.10: Clinical Strength Testing

Dale Cannavan and Katie Thralls-Butte

3.11: Blood Sampling

Ronald J Maughan and Susan M Shirreffs

3.12: Field Based Assessments for Determining Aerobic Fitness and Exercise Prescription

John Buckley, Jennifer Reed and Tim Grove

3.13: Quantifying Free-living Physical Activity and Sedentary Behaviours in Adults

Oliver J. Peacock, Enhad A. Chowdhury, and Dylan Thompson

3.14: Musculoskeletal Assessment

Nigel Gleeson and Andrea Bailey

Part 4

4.1: Assessment of Peripheral Blood Flow and Vascular Function

Benjamin J.R. Buckley, Maxime Boidin and Dick H.J. Thijssen

4.2: Application of Dual Energy X-ray Absorptiometry

Karen Hind

4.3: Assessment of Cardiac Structure and Function

Christopher Johnson, Keith George, and David Oxborough

4.4: Methods in Exercise Immunology

Nicolette C. Bishop and Neil P. Walsh

4.5: Skeletal Muscle Biopsy: Techniques and Applications

Richard A. Ferguson and Natalie F. Shur

Part 5

5.1: Exercise Testing in Obesity

David Broom, Matthew Capehorn, and Anna Myers.

5.2: Exercise Testing in Cardiovascular Disease

Victoria S. Sprung, John P. Buckley, and David L. Oxborough

5.3: Exercise Testing in Diabetes

Rob C Andrews, Parth Narendran, and Emma Cockcroft

5.4: Exercise Testing in Chronic Kidney Disease

Pelagia Koufaki, Sharlene Greenwood, and Jamie H Macdonald

5.5: Exercise Testing in Chronic Lung Disease

Oliver J. Price, Karl Sylvester, Shakespeare, J, and Mark A. Faghy

5.6: Exercise Testing in Breast and Prostate Cancer

John M. Saxton and Ruth Ashton

5.7: Exercise Testing in Peripheral Arterial Disease

Amy Harwood, Edward Caldow, and Gabriel Cucato

5.8: Exercise Testing in Children

Craig Williams, Melitta McNarry, and Keith Tolfrey

5.9: Exercise Testing in Older Adults

Matt W. Hill and Michael J. Price

5.10: Exercise Testing in Females

Kirsty M. Hicks, Anthony C. Hackney, Michael Dooley, and George Bruinvels

5.11: Exercise Testing in Pregnancy

Victoria L. Meah, Amal Hassan, Lin Foo, Christoph Lees, and Marlize de Vivo

5.12: Exercise Testing in Heart Failure

Eric J. Stöhr, Lauren K. Truby, Veli Topkara, Gordon McGregor, and Mark J. Haykowsky
