- Introduction: How to use this DDX Deck
 - Primary and secondary lesions
- Section 1: Blisters (Vesicles and Bullae)
 - 1. Herpes simplex infections
 - Clinical features
 - Treatment
 - 2. Varicella and herpes zoster
 - Clinical features
 - Treatment
 - 3. Hand, foot, and mouth disease
 - Clinical features
 - Treatment
 - 4. Impetigo and ecthyma
 - Clinical features
 - Treatment
 - 5. Staphylococcal scalded skin syndrome (SSSS)
 - Clinical features
 - Treatment
 - 6. Linear IgA dermatosis
 - Clinical features
 - Treatment
 - 7. Dermatitis herpetiformis (DH)
 - Clinical features
 - Treatment
 - 8. Pemphigus
 - Clinical features
 - Treatment
 - 9. Pemphigoid
 - Clinical features
 - Treatment
 - 10. Epidermolysis bullosa, non-scarring
 - Clinical features
 - Treatment
 - 11. Epidermolysis bullosa, scarring
 - Clinical features

- Treatment
- 12. Epidermolytic ichthyosis
 - Clinical features
 - Treatment
- 13. Incontinentia pigmenti
 - Clinical features
 - Treatment
- 14. Diffuse cutaneous mastocytosis
 - Clinical features
 - Treatment
- 15. Sucking blisters
 - Clinical features
 - Treatment
- 16. Miliaria
 - Clinical features
 - Treatment
- 17. Bullous drug reactions
 - Clinical features
 - Treatment
- Section 2: Mucosal Erosions (Blister Bases)
- 18. Aphthous ulcers
 - Clinical features
 - Treatment
- 19. Geographic tongue
 - Clinical features
 - Treatment
- 20. Stevens–Johnson syndrome (SJS) and toxic epidermal necrolysis (TEN)
 - Clinical features
 - Treatment
- 21. Mycoplasma-induced rash and mucositis (MIRM)
 - Clinical features
 - Complications
 - Treatment
- 22. Mucosal erosions in immunobullous and hereditary bullous diseases
 - Clinical features
- Section 3: Pustular Lesions
- 23. Erythema toxicum and transient neonatal pustular melanosis

- Erythema toxicum
- Transient neonatal pustular melanosis
- Treatment
- 24. Infantile acropustulosis
- Clinical features
- Treatment
- 25. Folliculitis
- Clinical features
- Treatment
- 26. Acne and periorificial dermatitis
- Clinical features
- Treatment
- 27. Pyoderma gangrenosum
- Clinical features
- Treatment
- 28. Acute generalized exanthematous pustulosis (AGEP)
- Clinical features
- Treatment
- Section 4: Red Papules and Nodules
- 29. Furunculosis and cellulitis
- Clinical features
- Treatment
- 30. Necrotizing fasciitis
- Clinical features
- Treatment
- 31. Mycobacterial infections
- Clinical features
- Treatment
- 32. Viral exanthems
- Clinical features
- Treatment
- 33. Gianotti–Crosti syndrome
- Clinical features
- Treatment
- 34. Scarlet fever
- Clinical features
- Treatment
- 35. Kawasaki disease
- Clinical features

- Treatment
- 36. DRESS syndrome
 - Clinical features
 - Treatment
- 37. Cutaneous larva migrans
 - Clinical features
 - Treatment
- 38. Papular urticaria and spider bites
 - Clinical features
 - Treatment
- 39. Scabies
 - Clinical features
 - Treatment
- 40. Syphilis
 - Clinical features
 - Treatment
- 41. Erythema multiforme (EM)
 - Clinical features
 - Treatment
- 42. Fixed drug eruptions
 - Clinical features
 - Treatment
- 43. Morbilliform and urticarial drug eruptions
 - Clinical features
 - Treatment
- 44. Erythema nodosum (EN)
 - Clinical features
 - Treatment
- 45. Panniculitis
 - Clinical features
 - Treatment
- 46. Dermatofibromas
 - Clinical features
 - Treatment
- 47. Keloids and hypertrophic scars
 - Clinical features
 - Treatment
- 48. Angiofibromas
 - Clinical features

- Treatment
- 49. Congenital self-healing reticulohistiocytosis (CSHR)
 - Clinical features
 - Treatment
- 50. Malignant tumors
 - Clinical features
 - Treatment
- Section 5: Flat Vascular Lesions, Blanching
- 51. Mottling
 - Clinical features
 - Treatment
- 52. Cutis marmorata telangiectasia congenita (CMTC)
 - Clinical features
 - Treatment
- 53. Livedo reticularis
 - Clinical features
 - Treatment
- 54. Urticaria and dermographism
 - Clinical features
 - Treatment
- 55. Port-wine stains and nevus simplex
 - Clinical features
 - Treatment
- 56. Vascular spiders
 - Clinical features
 - Treatment
- 57. Neonatal lupus erythematosus
 - Clinical features
 - Treatment
- Section 6: Raised Blanching Vascular Lesions
- 58. Hemangiomas
 - Clinical features
 - Treatment
- 59. Diffuse neonatal hemangiomatosis
 - Clinical features
 - Treatment
- 60. Tufted angiomas
 - Clinical features
 - Treatment

- 61. Hemangioendothelioma
 - Clinical features
 - Treatment
- 62. Pyogenic granuloma
 - Clinical features
 - Treatment
- 63. Lymphatic malformations
 - Clinical features
 - Treatment
- 64. Venous malformations
 - Clinical features
 - Treatment
- Section 7: Non-Blanching Vascular Lesions (Petechiae and Purpura)
 - 65. Vasculitis (Henoch–Schönlein purpura)
 - Clinical features
 - Treatment
 - 66. Periarteritis nodosa
 - Clinical features
 - Treatment
 - 67. Pernio
 - Clinical features
 - Treatment
 - 68. Progressive pigmented purpura (PPP)
 - Clinical features
 - Treatment
- Section 8: Papulosquamous Eruptions
 - 69. Pityriasis rosea (PR)
 - Clinical features
 - Treatment
 - 70. Psoriasis
 - Clinical features
 - Treatment
 - 71. Pityriasis lichenoides
 - Clinical features
 - Treatment
 - 72. Lichen planus (LP) and lichen nitidus
 - Clinical features
 - Treatment

- 73. Pityriasis rubra pilaris (PRP)
 - Clinical features
 - Treatment
- 74. Lichen striatus
 - Clinical features
 - Treatment
- 75. Porokeratosis of Mibelli
 - Clinical features
 - Treatment
- 76. Lupus erythematosus (LE)
 - Clinical features
 - Treatment
- 77. Dermatomyositis
 - Clinical features
 - Treatment
- 78. Ichthyosis
 - Clinical features
 - Treatment
- 79. Darier's disease (keratosis follicularis)
 - Clinical features
 - Treatment
- 80. Tinea (dermatophyte infections)
 - Clinical features
 - Treatment
- Section 9: Eczematous Disorders (Red with Disruption of Skin Surface)
 - 81. Atopic dermatitis (AD)
 - Clinical features
 - Treatment
 - Antimicrobial treatments
 - 82. Allergic contact dermatitis (ACD)
 - Clinical features
 - Most prevalent allergens in childhood
 - Treatment
 - 83. Juvenile plantar dermatosis
 - Clinical features
 - Treatment
 - 84. Nummular dermatitis
 - Clinical features

- Treatment
- 85. Seborrheic dermatitis
 - Clinical features
 - Treatment
- 86. Langerhans cell histiocytosis (LCH)
 - Clinical features
 - Treatment
- 87. Diaper dermatitis
 - Clinical features
 - Treatment
- 88. Intertrigo
 - Clinical features
 - Treatment
- 89. Candidiasis
 - Clinical features
 - Treatment
- 90. Perianal cellulitis
 - Clinical features
 - Treatment
- 91. Acrodermatitis enteropathica (AE)
 - Clinical features
 - Treatment
- Section 10: Skin-Colored Papules and Nodules with a Rough Surface
- 92. Warts
 - Clinical features
 - Treatment
- 93. Epidermal nevi
 - Clinical features
 - Treatment
- 94. Keratosis pilaris (KP)
 - Clinical features
 - Treatment
- 95. Corns and calluses
 - Clinical features
 - Treatment
- Section 11: Skin-Colored Papules and Nodules with a Smooth Surface
- 96. Molluscum contagiosum

- Clinical features
- Treatment
- 97. Milia and sebaceous hyperplasia
- Clinical features
- Treatment
- 98. Epidermal cysts
- Clinical features
- Treatment
- 99. Dermoid cysts
- Clinical features
- Treatment
- 100. Pilomatricoma and trichoepithelioma
- Clinical features
- Treatment
- 101. Granuloma annulare
- Clinical features
- Treatment
- 102. Neurofibroma and lipomas
- Clinical features
- Treatment
- 103. Piezogenic papules
- Clinical features
- Treatment
- 104. Sweat gland tumors
- Clinical features
- Treatment
- Section 12: White Lesions
- 105. Post-inflammatory hypopigmentation and pityriasis alba
- Clinical features
- Treatment
- 106. Vitiligo
- Clinical features
- Treatment
- 107. Lichen sclerosus (LS)
- Clinical features
- Treatment
- 108. Morphea
- Clinical features
- Treatment

- 109. Halo nevus
 - Clinical features
 - Treatment
- 110. Nevus depigmentosus and linear and whorled nevoid hypomelanosis (LWNH—Blaschkoid hypomelanosis—hypomelanosis of ito)
 - Clinical features
 - Treatment
 - Treatment
- 111. Nevus anemicus
 - Clinical features
 - Treatment
- 112. Ash leaf macules
 - Clinical features
 - Treatment
- 113. Piebaldism
 - Clinical features
 - Treatment
- 114. Waardenburg syndrome (WS)
 - Clinical features
 - Genetics
 - Treatment
- 115. Oculocutaneous albinism (OCA)
 - Clinical features
 - Treatment
- 116. Tinea versicolor
 - Clinical features
 - Treatment
- Section 13: Flat Brown Lesions
- 117. Mongolian spots
 - Clinical features
 - Treatment
- 118. Nevus of ota
 - Clinical features
 - Treatment
- 119. Café-au-lait macules (CALMs)
 - Clinical features
 - Treatment
- 120. Freckles

- Clinical features
- Treatment
- 121. Lentigines
 - Clinical features
 - Treatment
- 122. Nevus spilus
 - Clinical features
 - Treatment
- 123. Junctional nevi
 - Clinical features
 - Treatment
- 124. Becker's nevus
 - Clinical features
 - Treatment
- 125. Post-inflammatory hyperpigmentation
 - Clinical features
 - Treatment
- 126. Mosaic hyperpigmentation
 - Clinical features
 - Treatment
- Section 14: Raised Brown Lesions
- 127. Congenital melanocytic nevi (CMN)
 - Clinical features
 - Treatment
- 128. Intradermal melanocytic nevi
 - Clinical features
 - Treatment
- 129. Melanoma
 - Clinical features
 - Treatment
- 130. Pilar and smooth muscle hamartomas
 - Clinical features
 - Treatment
- 131. Mastocytosis
 - Clinical features
 - Treatment
- 132. Benign cephalic histiocytosis
 - Clinical features
 - Treatment

- 133. Acanthosis nigricans (AN)
 - Clinical features
 - Treatment
- 134. Confluent and reticulated papillomatosis (CARP)
 - Clinical features
 - Treatment
- Section 15: Yellow Lesions
- 135. Nevus sebaceus
 - Clinical features
 - Treatment
- 136. Juvenile xanthogranuloma (JXG)
 - Clinical features
 - Treatment
- 137. Necrobiosis lipoidica diabetorum (NLD)
 - Clinical features
 - Treatment
- 138. Focal dermal hypoplasia
 - Clinical features
 - Treatment
- Section 16: Congenital Circumscribed Hair Loss
- 139. Aplasia cutis congenita (ACC)
 - Clinical features
 - Treatment
- 140. Congenital triangular alopecia
 - Clinical features
 - Treatment
- Section 17: Acquired Circumscribed Hair Loss
- 141. Alopecia areata (AA)
 - Clinical features
 - Treatment
- 142. Tinea capitis and kerion
 - Clinical features
 - Treatment
- 143. Traction alopecia and hair pulling
 - Clinical features
 - Treatment
- Section 18: Congenital Diffuse Hair Loss
- 144. Ectodermal dysplasias (ED)
 - Clinical features

- Treatment
- 145. Hair shaft defects
 - Clinical features
 - Treatment
- 146. Congenital atrichia with papules
 - Clinical features
 - Treatment
- Section 19: Acquired Diffuse Hair Loss
- 147. Telogen and anagen effluvium
 - Clinical features
 - Treatment
- Section 20: Thickened Nails
- 148. Congenital malalignment of the great toe
 - Clinical features
 - Treatment
- 149. Pachyonychia congenita (PC)
 - Clinical features
 - Treatment
- 150. Ectodermal dysplasia (nails)
 - Clinical features
 - Treatment
- 151. Median nail dystrophy
 - Clinical features
 - Treatment
- 152. Trachyonychia (20 nail dystrophy)
 - Clinical features
 - Treatment
- 153. Psoriasis nails
 - Clinical features
 - Treatment
- 154. Lichen planus nails
 - Clinical features
 - Treatment
- Section 21: Thin, Slow-Growing, or Loss of Nail
- 155. Ectodermal dysplasia and nail-patella syndrome
 - Clinical features
 - Treatment
- Section 22: Pitted Lesions
- 156. Ear pits and lip pits

- Clinical features
- Treatment
- 157. Pitted keratolysis
- Clinical features
- Treatment
- Section 23: Involvement of Palms and Soles
- 158. Palmoplantar keratoderms (PPK)
- Clinical features
- Treatment
- Section 24: Photodistribution (Sun-Induced Lesions)
- 159. Sunburn
- Clinical features
- Treatment
- 160. Phytophotodermatitis
- Clinical features
- Treatment
- 161. Polymorphous light eruption (PMLE)
- Clinical features
- Treatment
- 162. Erythropoietic protoporphyria (EPP)
- Clinical features
- Treatment
- Section 25: Annular Arrangements
- 163. Annular arrangement
- Clinical features
- Section 26: Linear or Curvilinear Arrangements
- 164. Linear or curvilinear arrangement
- Clinical features
- Index
- A guide to topical steroids in children
